

Choose vegetables as part of a healthy snack and use low-fat Greek yogurt for a dip. Include vegetables more: with eggs at breakfast time and add extra (maybe double!) vegetables to your favorite dishes.

Eating vegetables as part of a healthy diet can:

How to get

- Lower chronic disease risk and cholesterol
- Support healthy digestion, skin and eyes
- Aid healing
- Promote healthy teeth and gums
- Keep you feeling full longer

Reasons to include vegetables:

- Low in fat and calories and no cholesterol
- High in potassium, dietary fiber,
- folate, Vitamin A, and Vitamin C
- Provide color and crunch (texture)
- to your meals and snacks

beets, onions, radishes, red peppers, red potatoes, red radicchio, rhubarb, tomatoes

asparagus, belgian endive, eggplant, peppers, purple cabbage, purple carrots, purple potatoes, purple salsify

golden beets, carrots, corn, peppers, rutabagas, squash, sweet potatoes, winter/summer squash, yellow potatoes, yellow pumpkin, yellow tomatoes
